SUMMARY

Full-stack developer and data science practitioner with hands-on experience building scalable web applications, real-time systems, and AI-powered projects. Proficient in Python, JavaScript (MERN stack), machine learning, and cloud platforms. Strong foundation in algorithms, data structures, and system design. Pursuing dual credentials in Computer Applications (BCA) and AI & Data Science (IIT Mandi).

EDUCATION

Indian Institute of Technology (IIT) Mandi

Minor Degree – Artificial Intelligence & Data Science

March 2024 – Present

CGPA: 9.2 / 10.0

Babu Banarasi Das University, Lucknow

Bachelor of Computer Applications (BCA)

August 2024 – Present

CGPA: 8.7 / 10.0

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, C, SQL

Web & Frameworks: React.js, Next.js, Node.js, Express.js, Flask, Prisma, HTML5, CSS3, Bootstrap, Chakra UI

Databases: MongoDB, MySQL, PostgreSQL

Data Science & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Data Cleaning, Feature Engineering

Tools & Platforms: Git, GitHub, Docker, AWS, Google Cloud, Postman, Jupyter Notebooks, Google Colab

Concepts: Data Structures & Algorithms, OOP, REST APIs, JWT Auth, WebSockets, CI/CD

PROJECTS

InstaX

Jan 2026

Next.js, React 19, TypeScript, Tailwind CSS, Prisma, Neon, Clerk, UploadThing, Vercel | **GitHub** | **Live**

- Built a modern social media platform with a clean, clutter-free interface for posting, media sharing, following creators, liking posts, commenting, and notifications.
- Used the Next.js App Router with TypeScript, Prisma, Clerk authentication, Neon PostgreSQL, and UploadThing to deliver a fast and scalable experience.
- Focused on performance, responsive UI, and smooth navigation to create a polished product-like user experience.

AIReel Studio

2025

Python, Flask, ffmpeg, ElevenLabs API, Whisper, AI/ML | **GitHub**

- Designed an AI-powered video editing platform to automate repetitive creator workflows like captioning, trimming, and video formatting.
- Integrated Whisper-based speech recognition for automatic subtitle generation and used ffmpeg subtitle filters to burn captions into videos.
- Built a Python + ffmpeg pipeline for resolution adjustment, format conversion, and clip trimming optimized for social media output.

Real-Time Chat Application

Nov – Dec 2025

React, Node.js, Socket.IO, MongoDB, JWT, Cloudinary | **GitHub** | **Live**

- Engineered a full-stack messaging platform using Socket.IO for real-time delivery with online/offline presence tracking and Cloudinary-backed media uploads.
- Implemented JWT authentication with bcrypt password hashing and built a responsive, theme-customizable UI deployed on cloud infrastructure.

Personal Portfolio Website

Nov 2025 – Jun 2026

React, Vite, Node.js, MongoDB, Tailwind CSS, Gemini AI, Cashfree | **GitHub** | **Live**

- Built a production-grade portfolio platform featuring AI chatbot integration, service marketplace, Google authentication, payment processing, and a centralized content management system.
- Implemented Cashfree payment verification, support workflows, user activity timelines, ML-powered tools, Cloudinary media handling, and automated receipt generation.
- Optimized SEO, image delivery, security, and observability using structured metadata, Sharp image processing, rate limiting, analytics, and comprehensive monitoring.
