SUMMARY

Full-stack developer and data science practitioner with hands-on experience building scalable web applications, real-time systems, and AI-powered projects. Proficient in Python, JavaScript (MERN stack), machine learning, and cloud platforms. Strong foundation in algorithms, data structures, and system design. Pursuing dual credentials in Computer Applications (BCA) and AI & Data Science (IIT Mandi).

EDUCATION

Indian Institute of Technology (IIT) Mandi <i>Minor Degree – Artificial Intelligence & Data Science</i>	March 2024 – Present <i>CGPA: 9.2 / 10.0</i>
Babu Banarasi Das University, Lucknow <i>Bachelor of Computer Applications (BCA)</i>	August 2024 – Present <i>CGPA: 8.7 / 10.0</i>

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, C, SQL
Web & Frameworks: React.js, Node.js, Express.js, Flask, HTML5, CSS3, Bootstrap, Chakra UI
Databases: MongoDB, MySQL
Data Science & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Data Cleaning, Feature Engineering
Tools & Platforms: Git, GitHub, Docker, AWS, Google Cloud, Postman, Jupyter Notebooks, Google Colab
Concepts: Data Structures & Algorithms, OOP, REST APIs, JWT Auth, WebSockets, CI/CD, Agile

PROJECTS

SmartMess <i>React, Node.js, Express, MongoDB, JWT, Vercel Link</i> - Built a comprehensive hostel mess management platform solving a real campus problem: students had no way to check menus, attendance was paper-based, and management had zero data on food quality or preferences. - Delivered real-time menu visibility for all four daily meals, digital attendance tracking, a 1–5 star rating system with comments, and a complaint portal with resolution workflows. - Developed an admin analytics dashboard surfacing rating trends, meal-wise attendance reports, and student registration approval — eliminating manual overhead and food wastage.	2025
AIReel Studio <i>Python, Flask, ffmpeg, ElevenLabs API, Whisper, AI/ML Link</i> - Designed an AI-powered video editing platform to automate repetitive content creation workflows — captioning, trimming, and multi-platform formatting — that typically consume hours of creator time. - Integrated Whisper-based speech recognition for automatic caption generation and burned subtitles into video using ffmpeg subtitle filters; added ElevenLabs API for AI speech synthesis. - Built a Python + ffmpeg pipeline for automated video processing: resolution adjustment, format conversion, and clip trimming optimized for social media aspect ratios.	2025
Real-Time Chat Application <i>React, Node.js, Socket.IO, MongoDB, JWT, Cloudinary Link</i> - Engineered a full-stack messaging platform using Socket.IO for sub-100ms real-time delivery with online/offline presence tracking and Cloudinary-backed media uploads. - Implemented JWT authentication with bcrypt password hashing; built a responsive, theme-customizable UI deployed on cloud infrastructure.	Nov – Dec 2025
Personal Portfolio Website <i>React, Node.js, MongoDB, Vercel Link</i> Developed a responsive full-stack portfolio with dynamic content, dark mode, and a MongoDB-backed contact system; deployed via Vercel with GitHub CI/CD for automated deployments.	Sep – Oct 2025
